

## Myron Stratton Home Standby Statement

The novel COVID-19 pandemic poses an immediate and real threat to the residents of the Myron Stratton Home, whose ages put them in the category of those most at risk for the serious consequences of this disease. Therefore, and in accordance with our important mission of protecting and caring for our residents, we continue to follow the CDPHE guidelines as restrictions are being lifted by implementing the following actions (among others):

- Indoor visits allowed per CDPHE guidelines and Winfield House protocol
- All doors to the facilities have been locked (with safety access still functional)
- All residents, employees, and visitors entering our buildings have temperature and COVID screening questionnaire upon entry to ensure there is no indication of symptoms
- Communal dining of residents only for all meals
- 90% of residents and staff have been vaccinated
- Well-fitted face masks and social distancing required for all residents, staff, and visitors

We are committed to protecting our residents to the fullest extent possible during this period of time and may take further restrictive action, as needed per the Residential Care Facility (RCF) Mitigation guidance.

The Myron Stratton Home
